

材料系 高分子材料 2022春 期中考试

疫情原因线上开卷考试，提交PDF文档，允许电脑打字完成考试。

考试要求：Answer with your own words. Use cartoons/drawings as needed.

考试内容原文：

1. Give a brief introduction on **Polylactic acid (PLA)** including its **structure, synthesis, physical properties, applications, etc., and the pros and cons as compared with traditional plastics.**
2. Give at least **2 examples** of **PLA blends** or **composites(nanocomposites)**, state their basic compositions, properties, and applications.
3. **Write a short essay on your opinion on biodegradable polymers (additional score if excellent)**
