

Exercise: find crystal structures that has **n** and **d** and show these glides.

**HRTEM images of certain axial directions in
silicon crystals**

- [100]
- [110]
- [111]
- [112]

Exercise: please find the HRTEM images taken along above directions to see 2D patterns formed from the projections of 3D crystal structures.

Exercise: try to draw the stereographic projection of 4, 4mm, 3m.

Exercise: Please give the general equivalent points and the distribution of symmetry elements in the following 2D space groups:

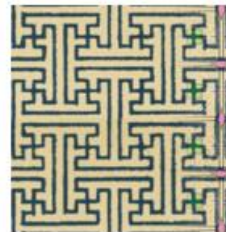

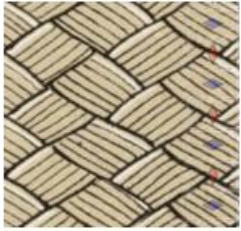

P2mm; P2mg; P2gg ?

Exercise: Please give the general equivalent points and the distribution of symmetry elements in 2D space groups No. 9 2D space group ***C2mm***

Exercises: marking space groups

Exercises: marking space groups

Exercises: marking space groups
