

HW1 Solution

1-dimensional chain of $[\text{Cu}(\text{L})\text{Cl}]$

$[\text{AgPW}_{11}\text{O}_{40}]^{1-}$ one-dimensional anionic chain

EXERCISE 3

Determine the lattice of the 2D structure (graphene).

EXERCISE 4 ✓

✓

✓

Exactly, with these patterns we can't determine the periodicity and the lattice

EXERCISE 5

✓

✓

✓

✓

所给图中无法找到点阵

Exercise 6

q determine the space lattice of graphite structure.

We only focus the projection of the graphite structure, so the space lattice of the projected structure is shown in the picture. We cannot determine whether the atoms are in the upper layers or lower layers.

homework

Provide the crystal lattices of the two structures below

No lattice can be found
